REQUEST FOR RECONSIDERATION

Dear Sir:

In response to the Final Rejection, dated August 19, 2005, the Examiner is most respectfully requested to reconsider his position stated therein in light of the following remarks.

REMARKS

The Examiner has based his Final Rejection primarily on the Scherzinger et al reference first applied by the Board in its decision. At the appeal hearing before the Board, the undersigned admitted that this reference was in some ways more pertinent than the art relied upon by the Examiner in that it showed a fixed gap between the insulator facing edges through which a wire could pass during the winding process without contact as was the case with the reference previously relied upon by the Examiner. However this reference relates and shows a quite different insulator than that invented by applicants and specifically claimed in the claims finally rejected.
